

## **WIRE CONTRIBUTOR AGREEMENT**

This Wire Contributor Agreement (“WCA”, or this “Agreement”) applies to any contribution that you make to any product or project managed by Wire Swiss GmbH (“Wire”) and sets out the intellectual-property rights you grant to Wire in the contributed materials.

The term “you” means the person or entity identified below. By clicking “I Agree” or otherwise Submitting a Contribution, you agree to be bound by these terms. Please read this Agreement carefully before agreeing. These terms and conditions constitute a binding legal agreement.

For clarity, this Agreement applies to Contributions made in the context of the Wire Cloud project, without limiting its applicability to any other Wire projects to which you may contribute.

### **Definition of Contribution**

The term “Contribution” or “Contributed Materials” means any source code, object code, patch, tool, sample, graphic, specification, manual, documentation, comment, or any other material Submitted by you to a Wire project.

‘Submit’ or ‘Submission’ means to upload, post, transmit, or otherwise make available materials to any Wire-managed repository, issue tracker, or channel; ‘Contribution’ includes all such Submissions and associated comments and metadata.

### **Copyright Assignment and Licence**

You hereby assign to Wire all right, title, and interest, including all economic rights (Nutzungsrechte), in and to your Contribution. To the extent that such assignment is invalid, ineffective, or unenforceable under applicable law, you grant Wire a perpetual, irrevocable, worldwide, royalty-free, transferable licence (with the right to sublicense through multiple tiers) to exercise all rights in the Contribution. This assignment applies to all Contributions you have previously Submitted to Wire.

Wire may use, modify, reproduce, distribute, and relicense the Contribution under one or more licences, including open-source and commercial licences, as part of its community and enterprise offerings. Wire currently makes its core projects available under an OSI/FSF-approved open-source licence.

To the maximum extent permitted by applicable law, you waive or agree not to assert any moral rights (Urheberpersönlichkeitsrechte) in your Contribution against Wire or its licensees. This assignment does not limit your right to use the same ideas or code independently or to contribute them to other projects under compatible open-source licences.

Wire has no obligation to use, merge, or distribute any Contribution. Wire owns all derivative works that it creates from a Contribution, to the extent those derivatives form part of Wire’s proprietary or enterprise software.

Except as expressly set out in this Agreement, no rights or licences are granted by implication, estoppel, or otherwise.

### **Patent Licence**

You grant Wire a perpetual, irrevocable, worldwide, royalty-free, non-exclusive licence under any patents you own or control that would be infringed by your Contribution, including the right to make, use, sell, import, or otherwise distribute products containing the Contribution, and to sublicense these rights to third parties. If you or your Employer (later defined) files a patent action alleging that a Wire project infringes, the patent licence granted in this CLA terminates upon such filing.

### **Contributions made in the Course of Employment or on Behalf of a Company**

If you are making a Contribution in the course of your employment or as a contractor, consultant, or agent of another entity (your “Employer”), you represent and warrant that: (i) you are authorised by your Employer to make the Contribution and to grant the rights described in this Agreement; or (ii) your Employer has executed or will execute this Agreement separately to confirm such authorisation. In that case, the term “you” in this Agreement refers to both you and your Employer collectively. You agree to provide Wire with written confirmation of such authorisation upon request.

Wire may identify you or your Employer as a contributor and retain contribution metadata for compliance, security, and attribution purposes in accordance with applicable data-protection laws.

### **Representations and Warranties**

You represent and warrant that: (i) each Contribution is your original work; (ii) you have full authority to grant the rights set out in this Agreement; (iii) to your knowledge, the Contribution does not infringe any third-party intellectual-property rights; and (iv) the Contribution complies with all applicable export-control and import laws. You agree to notify Wire promptly if you become aware of any circumstance that would make these representations inaccurate.

### **Disclaimer of Warranties**

All Contributions are provided “as is”, without any express or implied warranty of quality, fitness, or suitability for a particular purpose. Each contributor provides their Contribution in good faith but does not guarantee that it is free from defects or errors. Wire assumes full responsibility for testing, validation, and distribution of the integrated code. Nothing in this clause limits or excludes your representations regarding authorship or right to grant the licences set out in this Agreement.

### **Precedence of Other Agreements**

If you have another agreement with Wire (such as an employment or consulting agreement) that provides for a broader assignment of rights to Wire, that other agreement prevails over this WCA.

### **Security Practices**

You agree to comply with Wire's publicly available security policies and contribution guidelines, as updated from time to time, when submitting Contributions or interacting with Wire-managed repositories.

### **Governing Law and Jurisdiction**

This Agreement and any non-contractual obligations arising from it are governed by the laws of Switzerland, excluding its conflict-of-law principles. Exclusive jurisdiction lies with the competent courts of Zug, Switzerland. For the avoidance of doubt, this clause applies only to this Agreement and does not alter the governing law of any open-source licence under which Wire may distribute the Contribution.

### **Electronic Acceptance**

By clicking "I Agree" or submitting a Contribution, you acknowledge that you are entering into a legally binding agreement with Wire and consent to the use of electronic communication for contract formation and recordkeeping.
